

ENGINEERING EXPERTISE BUILT ON TRADITION

Rapid technical development require continous evaluation in lubricant technology too. Hungary also has a long-standing tradition in the development and manufacture of lubricants, as well as in the distribution and application of products supplied by Hungarian and international oil companies.

In the past, numerous Hungarian industrial research institutes, universities and college research centres operated successfully in the fields of lubricant research, testing and evaluation, product development and application engineering.

As a result of economic and social changes, the specialists working at these institutions often continued their careers in private enterprises, applying their professional knowledge and experience.

As part of this process WSW Proding Ltd. was established in 1990 and is 100% Hungarian-owned. Thanks to the team's technical expertise and extensive experience in lubrication engineering, our company has become a recognised and key player in the market for industrial, transportation and special-purpose, custom-engineered lubricants.

THE INDUSTRIAL LUBRICANT SPECIALIST

In-house-developed and manufactured lubricants for transport, industrial and special lubrication applications.

WWW.WSWPRODING.HU

OUR WSW PRODUCT RANGE

We offer our proprietary lubricants, developed and manufactured in-house, for both transportation and industrial applications:

Transportation lubricants

For rail and road transport, inland waterway shipping, and agricultural and construction applications.

Industrial lubricants

For the heavy and light industries, food industry, processing industry, machinery manufacturing, energy industry, mining industries and raw materials industry.

More than 35 years of experience, our stable corporate background and the expertise of our specialists confirms every lubrication solution we offer.

Continuous product development and the adoption of new technologies ensure that we provide a reliable, professional answer to every technical requirement that arises. We believe that working together with a commitment to quality and innovation also contributes to our partners' long-term business success.

CORE ACTIVITIES OF WSW PRODING LTD.

Manufacture of in-house, custom-developed lubricants

As part of our lubricant research and development activities, we develop and manufacture products tailored to specific lubrication requirements and to the demands of the particular lubrication demands.

Relaying on many years of experience, we develop the most suitable lubricant solution for every application. Using a product that meets the service requirements of the application helps keep operating costs low, as the lubricant performs its function optimally.

We develop the best possible solution for our partners whether is for a lubricating grease, a lubricant for the glass industry, a special engine oil, a steam cylinder oil, a candle-wick oil, or a special drilling, cutting or broaching oil, etc.

Custom private-label manufacturing (private-brand production)

We manufacture own-brand lubricants quickly and flexibly. Our reliable, tailored solutions support suppliers and distributors wishing to market lubricants under name of their own brands.

We can provide a wide variety from our lubricant portfolio, including manufacture of the required products and packaging of bulk finished products.

Lubricant distribution

WSW Proding Ltd. is official distributor of PETRONAS lubricants in Hungary and represents PETRONAS industrial lubricants; PETRONAS Syntium and PETRONAS Urania engine oils; PETRONAS Arbor agricultural oils; and PETRONAS Tutela transmission and gear oils. The company is the exclusive distributor in Hungary of the full range of Chempioil lubricants.

In addition, we offer products of recognised and reputable international lubricant manufacturers. Some of the lubricant brands we distribute include: ExxonMobil, Mobil, Shell, Castrol, ENI (Agip), Eurol, Mannol, Aral, Total, Q8, Elf, Selenia and Texaco.

To provide our partners with a high standard of service, we continuously expand our warehouse stock and operate a flexible logistics system. This enables us to deliver products in the quality requested by our customers, by the agreed deadline and to the specified location.

Our expert sales professionals receive continuous training and have extensive industry experience; they support our customers through personal contact. The products we distribute are suitable for an exceptionally broad range of applications across all user sectors. Our portfolio includes engine oils for passenger cars and commercial vehicles, gear and transmission oils, automatic transmission fluids (ATFs), industrial and agricultural oils, greases, chemicals, antifreeze fluids and brake fluids.

Lubricant testing

Periodic laboratory testing is intended to provide continuous monitoring of lubricant condition. Accurate analysis of key parameters enables a professional assessment of the quality of oil load and helps identify opportunities to maximise their service life. In our own laboratory, we can perform most of the necessary tests using modern instruments. Our highly qualified technical managers, with many years of professional experience, support our partners' lubricant use by evaluating the results and providing technical recommendations.
